

# **TEAM V8 JAVASCRIPT FUNDAMENTAL PROJECT**

## **QUESTION (1)**

Explain the concept of “Case Sensitivity” in JavaScript and examples. Why is it important for beginners to understand?

## **SOLUTIONS**

Case Sensitivity in JavaScript tells apart lowercase and UPPERCASE letters. Language Construct examples called keywords must be written in lowercase letter.

For instance, control flow are one of the language construct in JavaScript, and its keywords must be written in the lowercase letters. ( if, else, switch, case, and default.)

### **QUESTION (1b)**

Why is it important for beginners to understand Case Sensitivity?

### **SOLUTIONS**

To avoid being perplexed due to many bugs that is avoidable while writing codes.

In order to maintain a balanced flow of consistency and readability during, and after coding.

**END OF DISCUSSION.**
